Gruppe VI F

Preamble:

Gruppe VI F was the technical section of Amt VI and was broadly responsible for the provision of technical material for the use of the Laendergruppen, and also for the supervision of W/T communications for the Amt. At this stage, little information is available on the technical aspects of the Gruppe as so far only one prominent member of the Gruppe, Dr. SCHAEFFNER, is under interrogation. It will be appreciated too, that owing to this specialised nature of the work of the Gruppe, information from other sources has been only on very general lines. The present summary, therefore, is deficient in many aspects and these deficiencies can only be rectified when more of the leading characters in the Gruppe have been arrested and interrogated. The lack of information is confined not only to the technical side of the Gruppe but also to its organisational development, information of which is still scanty. The main purpose of this publication, therefore, is to give a broad outline of the development and work of the Gruppe and a list of the personalities known to have worked at some time for the Gruppe.

A. The Organisational Development of Gruppe VI F.

1. The Formation of Gruppe VI B in 1939:-

The origin of the technical department of Amt VI was a somewhat casual affair, and it should be borne in mind that in the original organisation of the RSHA, Amt I was responsible for the overall provision of technical equipment for the whole of the RSHA, the competent Gruppe being Gruppe I G under Stubaf RAUFF. The new Amt VI required of course a W/T station to establish communications with its projected representatives in foreign countries, and for this reason a W/T department was set up providing a central receiving and transmitting station at Grunowald. This department was a purely technical one staffed mainly by civilian technicians and was placed under the control of Gruppe VI B, set up with NAUJOCKS as Gruppenleiter, the Gruppe being described as a technical section of the Amt.

It was on NAUJOCKS's suggestion that such a section was set up as he foresaw that a department which intended to run its own agents would require a section to provide the necessary materials. It should be remembered too, that the old Amt III/3 of the SE-Hauptamt had no corresponding section which could provide any basis for expansion, nor had NAUJOCKS any technical staff already at his disposal. The development of the Gruppe, therefore, was rather haphazard and it was not until mid-1942 that it was finally established as an important section of the Amt, with any established organisation and wholly defined functions.

This does not apply to the W/T side of the Gruppe which necessarily had to develop in keeping with the development of the Amt as a whole. The W/T section soon transferred from Grunewald to Wanssee and was to become known as the Wanssee Institute, and owing to its functions can be treated separately from the rest of the Gruppe. The development of the Havel Institute, therefore, forms the subject matter of Part B, Para 1.

2. The Early Enterprises - the Forging of Bank of England Notes:-

The first impetus given to the Gruppe VI B came in the shape of a request, or rather a demand, from HEYDRICH that NAUJOCKS should proceed with the manufacture of forged Bank of England notes to be used in the invasion of Great Britain. As can be imagined, however, the Gruppe was quite incapable of

meeting this demand without considerable preparation as no qualified staff was available. To meet HEYDRICH's insistant demands, therefore, NAUJOCKS was able to recruit for his department a large staff of civilian assistants mainly through the Deutsches Arbeitsamt. The whole energies of the Gruppe were directed to this new enterprise not through enthusiasm for the work, but because of HEYDRICH's intolerant attitude. By the Summer of 1940 the notes were in production on some scale, but the results were not of high quality, and moreover, the notes were printed in denominations which made them practically useless for the purpose for which they were intended.

3. The Dismissal of NAUJOCKS:-

As a result of this failure, ~~NAUJOCKS~~ was dismissed from his position as Gruppenleiter in the Autumn of 1940. In the first year of its existence, therefore, the Gruppe had achieved little of note, but the experience gained in the manufacture of the forged Bank notes was to prove of some value when the Gruppe turned to the more routine task of preparing false identity documents and passports. The initial work on such forgeries was undertaken by Dr. LANGER, a technical but eccentric socialist from Vienna, whom NAUJOCKS had recruited when the Gruppe was first formed. meantime, as a result of NAUJOCKS's dismissal, his deputy Stubaf FURHMANN acted as Gruppenleiter. The Gruppe, however, remained a small one and the period until the Summer of 1941 can only be regarded as a period of training for the Gruppe itself.

4. The Organisation in 1941:-

By early 1941 a complete reorganisation of the Amt was under consideration and reached the length of being drafted on paper. This paper organisation dated early 1941 shows that Gruppe VI B was destined to become VI F with Stubaf RAUFF as Gruppenleiter and Stubaf FURHMANN as his deputy. RAUFF, as mentioned in Para 1, was the Gruppenleiter at that time of Gruppe I G and it is not certain that he ever did in fact become Gruppenleiter of VI F. It was not until later in the year that the reorganisation of Amt VI finally took place when Gruppe VI B did in fact become VI F with, however, Stubaf DOERNER as Gruppenleiter. The internal organisation of the Gruppe at that time is uncertain but it is probably that there were - apart from the W/T section at Wamsee - at least three other sections, one dealing with Administration, the other two dealing with Secret Inks under Dr. SCHAMBERGER and the other under Stubaf KRUGER dealing with forged documents. There is little indication, however, the Gruppe was either active or efficient in its work at that time, the very opposite is in fact the case if the testimony of Dr. LANGER can be taken as authentic.

5. Reorganisation in Summer 1942:-

The first major reorganisation of Gruppe VI F took place in the Summer of 1942, the immediate reason being HIMMLER's direction that the production of sabotage material should be undertaken on more serious lines, and as VI F 3 had previously been the source of such material for Amt VI, the new activity was centralised in VI F. Side by side with this increased interest in sabotage material was the creation of a new Referat VI F/O (Unternehmen OTTO) which was created to deal with the actual training of sabotage agents and which was also responsible for their despatch to various countries. Unternehmen OTTO is dealt with in detail in Part B, Paragraph 2. The creation of this Referat led to conflict with the Laendergruppen as this assignment to VI F had the result that that Gruppe cut across the work of the remaining Laendergruppen.

③

/3.....

At the same time greater attention was paid to the W/T aspect of Amt VI work, and as the Amt under SCHELLENBERG with the support of HIMMLER was at that time taking a new lease of life and greatly extending its activities, more centralised and expanded W/T service became necessary. For this reason the Havel Institute was created, becoming a separate referat known from then on as VI F (H).

6. Organisational Structure of Gruppe VI F in 1942:-

Details of the organisational structure of Gruppe VI F at this time are not clear, and there appear to have been frequent modifications between 1942 and the end of 1943. The following chart is however probably approximately correct.

<u>Gruppe VI F</u>		
<u>Gruppenleiter : Stubaf DOERNER</u>		
<u>Referat</u>	<u>Sachgebiet</u>	<u>Referent</u>
VI F 1	Administration	Ostuf NOETTENBERG
VI F 2	Broadcasts Monitoring	
VI F 3	Technical Materials	Stubaf LASSIG
VI F 4	Forgery of Documents	Stubaf KRUEGER
VI F 5	?	
VI F 6	Wireless Interception	Stubaf GOTTLÖB
VI F 7	Library	Stubaf FEHSEL
VI F/O	Unternehmen Otto	Stubaf DOERNER
VI F Hauskapelle.	Security	Krim.Dir.GANS
VI F (H)	The Havel Institute	Stubaf SIEPEN

The connection between VI F 2 and VI F 6 in the above chart is not clear: Stubaf GOTTLÖB left the Gruppe in the course of 1943 to go on a special mission to Portugal when the Referat was probably dissolved. VI F 2 was absorbed in August 1943 by VI F (H).

VI F 7 was a new departure for the Gruppe: the Referent Stubaf FEHSEL had been previously Referent VI A 8, which in the years 1940-42 represented the reference library of Amt VI. In April 1942 this library was transferred to VI F to become VI F 7 with FEHSEL as Referent and Haupt LANGLOTZ as his assistant. The library was finally transferred to Gruppe VI-G under KRALLERT at the end of 1943.

With this new reorganisation the Gruppe considerably increased in personnel, while VI F 3 and VI F 4 greatly intensified their own branches of work. The activities of these two Referate are dealt with in Part B, paragraph 3 and 4.

7. Reorganisation in September 1943:-

The agent training undertaken by VI F was stopped in September 1943, the sabotage functions passing to the new Gruppe VI S. As a result of this change the Gruppe underwent a simplification in its internal structure, the breakdown being as follows:-

Gruppenleiter : Stubaf DOERNER

<u>Referat VI F 1</u>	<u>Referent Stubaf SIEPEN</u>
<u>VI F 2</u>	Transferred to Havel Institute.
<u>VI F 3</u>	Technical Matters
<u>VI F 4</u>	Forged Documents
	Stubaf LASSIG
	Stubaf KRUEGER

Both Referate VI F 1 and VI F 2 were dissolved and were absorbed into VI F (H), VI F 2 becoming VI F (H) 2 under Oschaf HERB, while VI F Hauskapelle became Abteilung VI F (H) 4.

8. Absorption of the Abwehr in Summer 1944:-

In the Spring of 1944 Stubaf DOERNER was posted as 1c to an SS Corps on the Eastern Front. No Gruppenleiter was immediately appointed in his place as the fusion of the Abwehr with Amt VI was at that time under consideration. When the absorption did take place Oberstltn. ~~X~~BOENING of the Abwehr was placed in joint command of Gruppe VI F and of Abteilung Mil E and Mil G. the sections of the ~~Abwehr~~ corresponding to Gruppe VI F in Amt VI. The organisation of Gruppe VI F was not materially affected, VI F 1 and VI F 2 being responsible for the Havel Institute, VI F 3 and 4 continuing their previous functions.

The only subsequent modification was the creation in the Spring of 1945 of a new Section, VI F (BFN), the Beschaffungstelle fuer Nachrichtengeraet, a section under Hstuf STECKHAN whose intended responsibility was the provision of intelligence apparatus to VI F (H) and Abt. Mil E.

B. The Functions of Gruppe VI F Referate.

1. The Havel Institute:-

a) The Wansee Institute 1939-42:

The Havel Institute was created in September of 1942 on the orders of HIMMLER himself as the general situation of Amt VI W/T communications was unsatisfactory. It became known as Referat VI F (H) of Gruppe VI F. Previously the first Central receiving station of Amt VI had been set up in December 1939 at Grunewald in Berlin, at that time the headquarters of Gruppe VI B under NAUJOCKS. Early in 1940 the W/T section of VI B transferred to Wansee and became known as the Wansee Institute, maintaining a comparatively small staff of technicians and nominally under the control of NAUJOCKS. The staff of the Institute under Hstuf WERNER and a teletype section under Hstuf REDLIN.

b) Creation of the Havel Institute in 1942:-

The new Havel Institute created in 1942 was much extended in functions and personnel: the Letter of the new Referat was Stubaf ~~X~~SIEPEN with Hstuf ~~X~~SCHAEFFNER as his deputy. The section took over a new radio net-work named 'Netz B', a national network comprising all the auxiliary W/T stations set up within the Reich itself, in addition to the already existing Netz 'A' which controlled the foreign stations. In addition seven Abteilungen were set up within the Referat itself, details of which are given below. SIEPEN remained in command until December 1944 when he was replaced by Stubaf ~~X~~FAHROSS, but SCHAEFFNER remained as deputy Leiter.

(S)

15.....
325-3-419

c) W/T Stations in the B-Netz:-

The following W/T stations in Germany came under the control of the Havel Institute:-

Babelsberg:-

Near Berlin, acting as the alternative station for the Havel Institute itself, but also communicating with outstations in Norway.

Gottenhafen:-

Near Danzig, communicating with Northern Europe.

Kirchsassen:-

Near Prague and communicating with South-West Europe and the Balkans.

Marienbad:-

Station in Czechoslovakia communicating with the Balkans.

Vienna:-

Communications with the Balkans.

Bamberg:-

Near Nurenburg, responsible for communications with Italy.

Burglengenfled:-

In Bavaria.

Nickersberg:-

In Baden, responsible for communications with France and Western Europe.

Apart from the recognised B-Netz described above, efforts were made at the end of 1944 to set up alternative W/T stations to replace the Wansee station in case of the evacuation of Berlin. Stations were constructed at TEGERNSEE in Bavaria and at HALL near Brunswick. A further station was constructed in 1945 on the instructions of FAHROSS at GROSSGESCHWENDA in Thuringia.

d) Schools Controlled by the Havel Institute:-

In addition to being responsible for the maintenance of Amt VI W/T communications, the Havel Institute also trained radio personnel and W/T agents of Amt VI, to whom it supplied the necessary radio equipment. For this purpose 4 schools were maintained by the Havel Institute as follows:-

The Lehnitz School, near Potsdam
The Harzburg School, near Braunschweig
The Pansdorf School, near Luebeck
The Wansee School in Berlin.

In addition to running the above schools under its direct control, VI F (H) also supplied technical staff to the various schools run by the Laendergruppen themselves, such as the VI B schools at Paris, the Hague, Stuttgart etc.

e) Organisation of VI F (H):-

The Havel Institute itself was organised into seven sub-sections covering the different functions which the Institute had to perform. Details of this organisation are given below.

Reforat VI F (H)Reforent Stubaf FAHROSS

<u>Abteilung</u>	<u>Sachgebiet</u>	<u>Leiter</u>
VI F (H) 1	Verbereitung fuer technische Einsatz.	Hastuf SCHAEFFNER
(H) 2	Funkunterlagen und Betrieb.	Oschar HERB
(H) 3	Schlüsselwesen	Ang. VOIGT
(H) 4	Abwehr	Hastuf MUELLER
(H) 5	Verwaltung, Werbung	Ostuf REINHARD Dr. HAGEMEISTER
(H) 6	Schulung	Ang. EAUL
(H) 7	Geräte	Ustuf SIMON

f) Evacuation of the Havel Institute:-

The Institute was divided into two parts in April 1945, conforming to the general Nordstab and Sudstab of the RSHA. The Gruppe NORDEN under FAHROSS left Berlin on April 10th for the alternative station at Luebeck while the Gruppe Sueden under SCHAEFFNER left on the 5th for Thuringia, later proceeding to Tegernsee. The South Group dissolved in the early days of May.

2. Unternehmen Otto - Reforat VI F/O (1942-3).a) Functions:-

Unternehmen Otto or Ottladen was the name given to the special Reforat of VI F created in July 1942 on the orders of HIMMLER. The special function of the Reforat was the training of sabotage agents, but it is important to note that the Reforat was responsible for the missions of the agents it trained. In this way Unternehmen Otto cut across the activities of the Laendergruppen and as a result met with the opposition of the Gruppenleiter. The Reforat also trained its agents in W/T and codes, drawing on the special section of the Gruppe for instructors in these subjects - Dr. LANGER for codes, and the Havel Institute for W/T instructions.

b) Organisation:-

The Reforat VI F/O was organised on a regional basis, there being three geographical sections together with an administrative and training section. The Organisation was on the following lines:

Unternehmen Otto (Reforat VI F/O)

Leiter: Stubaf DOERNER (also Gruppenleiter VI F)

Deputy: Stubaf LASSIG

Administration Abteilung:

Ostuf NOETTENBERG

Ostuf JANSEN

Ostuf MOECK

Haschar LIEBE

Training Abteilung:

Hastuf DERSCH

Oschar WESTPHAL (sabotage)

Dr. LANGE (codes)

/7.....

Abteilung Naheres Osten:

Hastuf MANDL (later VI E)
Ostuf BOHNHOEFF

Abteilung Nord:

Hastuf DAUFELDT (later VI D)
Ostuf SCHWARZENBACHER (later
VI E).

Abteilung Morocco:

Hastuf SCHULZE (later VI B)
Hastuf WEIDELING (later VI F)

In addition to the above sections there was a further special section in Gruppe VI F which did not come under VI F/O but which performed very similar functions. This was the so-called Balkans Abteilung under Hastuf REINL (later Leiter Dienstelle 1000), assisted by Hastuf WANDHOF, who later went to SD-Hauptamt MAASTRICHT.

c) Outside Organisations:-

In February 1943, Referat VI F/O extended its scope by the setting-up of three dependent organisations through which its activities were to be directed. These were the Dienstellen 1000, 2000 and 3000.

(i) ~~X~~ Dienstelle 1000:-

This Stelle was set up in Belgrade in March 1943 under Hastuf ~~X~~ REINL and was based on the Balkans Abteilung mentioned in paragraph b) above. The Stelle had the function of organising a stay-behind sabotage and resistance movement in the Belgrade area. The Dienstelle 1000 however had only a brief period of existence and was soon dissolved.

(ii) ~~X~~ Dienstelle 2000:-

This Stelle was set up in Salonika under Ostuf ~~X~~ RIED, with functions similar to that described under Dienstelle 1000. The Stelle worked in close liaison with Dienstelle 3000 below and in fact came under the control of that Stelle in December 1943, when both Dienstellen were placed under the command of Gruppe VI E, Referat VI F/O by that time being dissolved.

(iii) ~~X~~ Dienstelle 3000:-

Dienstelle 3000 was set up in Athens in April 1943 under Stubaf BEGUS. It had its own W/T station and until August 1943 reported directly to VI F. After August the Stelle continued to report to VI F, though by that time VI F/O had been dissolved, a state of affairs which continued to exist until December, when VI E became the controlling Gruppe. The original functions of the Dienstelle 3000 had been to organise a sabotage and political espionage network in Southern Greece and also to organise routes for the despatch of agents to the Near and Middle East for VI F/O at the same time acting in a similar capacity for other Laendergruppen interested in that territory. When VI E assumed command of the Stelle in December 1943, these functions were correspondingly modified: the Stelle was now instructed to work in liaison and under the supervision of WAWRSINOWSKY, the VI E Hauptbeauftragter in Athens, while facilitating the passage of agents to the Middle East would be on behalf of Laendergruppen only and not for VI F/O which had been dissolved. The Stelle now divided its functions between Ang. LUDEWIG (previously VI F/O) who organised the sabotage network and BEGUS himself who was responsible for the espionage side.

d) Activities of Dienstelle 3000:-

BEGUS worked in close liaison with the GFP Athens from whom he recruited most of his important agents for political espionage

encl to RE CA 1087

age purposes. BEGUS concentrated on obtaining information on Greek political movements, (especially the underground movement), on the Greek Government, on the policy of neutrals through their representatives in Athens and on the work of Allied Intelligence Services in Greece. He was successful in penetrating EAM, ELAS and EDES through agents who held leading positions in these organisations. The leading agents under BEGUS organised their own networks and submitted consolidated reports to Dienststelle 3000. Agents were also established in society circles in Athens. Through these sources BEGUS was able to pass to VI E through JAWA and WAWRSINOWSKY a document containing peace proposals from the Greek Government to the German plenipotentiary in Greece. The penetration of foreign diplomatic circles was also considerable, mainly through the network of a certain BURG-HORNY.

On the sabotage side LUDEWIG established cells in Athens, Paragus, Thebes, Karditsa and on the West Coast of Greece.

BEGUS himself was transferred to Italy in June 1944 to work with VI S, his place as Leiter being taken by ~~Ostuf NEHEN~~ / B FUEHRER. Other members of the staff of Dienststelle 3000 were ~~Oscar~~ KRONBERGER - now arrested - Haschaf WOLF, Ang. WILLSCH and Uffz. DOELLE. WILLSCH, mentioned above, was placed in command of Dienststelle 2000 in May 1944 as it was suspected that that Stelle had been detected by the Allies and was in danger of attack. Ostuf RIED, the Leiter of the Dienststelle returned to Germany.

c) Other Operations Controlled by Referat VI F/O:-

~~Ostuf~~ LANGENBACH, Leiter of Abteilung West was responsible for the training of some 25 foreign Legionaries, 15 of whom were parachuted into Tunis in February 1943 with sabotage missions. Only two of these agents returned, one of whom was KOHLHASS later of Gruppe VI C. LANGENBACH worked in close cooperation with ~~Ostuf~~ SCHULZE of the Abteilung Morocco who had previously been the SD representative in Tangiers.

DAUFELDT of Abteilung Nord was responsible for the direction of training of a Norwegian called PETERSEN who was destined to be sent to London via Sweden on a sabotage reconnaissance mission. This enterprise was not successful. DAUFELDT himself was later sent to Copenhagen as representative of VI D 3.

f) Dissolution of Unternehmen Otto:-

Referat VI F/O was finally dissolved in September 1943 when it became apparent that the effort expended in this enterprise was not yielding satisfactory results. The primary function of the Referat had been sabotage which now assumed considerable importance in the eyes of HIMMLER who ordered the creation of Gruppe VI S under SKORZENY to specialise in that subject. The Referat was therefore dissolved, the personnel being posted either to Gruppe VI S or to their respective Laendergruppen - i.e. DAUFELDT to VI D, MANDL to VI E, etc. In addition, as mentioned above, Dienststelle 2000 and 3000 came under the control of VI E.

5. Referat VI F 3.

Referat VI F 3 was responsible for the preparations of special Intelligence material for the use of other Laendergruppen including secret inks and poisons. It had been the competent Referat for the production of sabotage material but with the creation and development of Gruppe VI S at the end of 1943 its activity was subsequently greatly reduced.

The Referat had sub-divisions, details of which are not available, but it is known that the Referat controlled a camp at Friedenthal which dealt with storage of weapons, uniforms and

19.....4
32-5-3-4

equipment, and also had a small mechanical workshop whose chief function was liaison with VI F 4. The workshop dealt with such matters as photographing pictures appearing in technical newspapers, magazines, and books and on occasion pictures of land maps. This section was under the control of Ang. RAU assisted by Oschaf GEBHARDT and Ang. PAUL, PAUL's special function being the preparation of plates for counterfeit purposes which were passed to VI F 4.

VI F 3 also controlled the Forschungsinstitut which was located in Marienbad. This Institute was one of those which KRALLERT, Gruppenleiter VI G, intended to take over and develop for the Amt as a whole, but as it was constituted at the latter half of 1944 it represented a small section studying Allied industry, communications and transport for the purpose of preparing plans for sabotage. The staff was a composite one and included in addition to SD personnel, civilians and Army personnel. The Institute also worked in liaison with Sonderkommando DORA and its subordinate functions.

The Referat was also responsible for the preparation of secret inks and poisons, the leading personalities in this type of work being Stubaf ~~TAUBOECK~~ and Dr. ~~SCHAMBERGER~~ a former chemist on the staff of I.G. FARBEN. Little is known of this section of the Referat.

4. Referat VI F 4.

This Referat was responsible for the production of all types of forged documents for the use of agents employed by other Landesgruppen. The forging of documents had been undertaken at an early stage in the history of VI F, but had not been of very high standard, the chief personalities concerned in this work being Dr. LANGER, and Ang. RAU, later of VI F 3. In addition to the manufacture of forged documents, the Referat had also been concerned with the attempts at counterfeiting Bank of England notes (see Part A, Para 3.) It was not until late Summer 1942 that attempts were made to improve the work of the Referat and in particular the forging of Bank notes was undertaken on a much wider scale. The printing shop and workshop for the production of both forged documents and forged notes was set up in August 1942 at the concentration camp at Sachsenhausen. The personnel for this work was largely drawn from skilled technicians interned in other concentration camps in Germany, there being no restriction on the use of Jews.

a) The Forging of Documents:

Prior to the setting up of the workshop at Sachsenhausen the forging of documents on behalf of VI F had been largely carried out by private firms having the confidence of the SD. The work thereafter was concentrated at Sachsenhausen under the supervision of Stubaf KRUEGER. Among the documents reproduced were passports, birth certificates, pay books Red Cross writing paper, identity cards of all kinds, British Postage stamps, Dutch receipt stamps, and for propaganda purposes samples of the British Coronation stamp showing the Queen replaced by Stalin, and overprinted with the inscription 'Tchern 2.6.44.' Other British stamps also for propaganda purposes showed King George with a prominent Jewish nose. These stamps were distributed among all Landesgruppen of Amt VI, but their subsequent distribution was largely confined to the Iberian Peninsula and the Balkan States.

b) Counterfeit money - Unternehmen Bernhard:

The production of counterfeit Bank notes which was begun by VI F 4 was on a much more extended scale than the previous attempt in 1940. The enterprise went under the name of Unternehmen Bernhard and early in 1944 KALTENBRUNNER himself developed a special interest in the matter, the other prominent personality

being the notorious Stubaf SCHWENDT @ WENDIG who operated in Italy.

By 1944 the monthly production of forged notes had risen to 650,000 of which some 40% were usable. The production of these notes led to a considerable amount of corruption among the personnel handling the money. By January 1945 the camp at Sachsenhausen was threatened by the advance of Allied troops and was forced to evacuate to Austria where finally the camp was over-run, the notes being variously disposed of by burning or by dumping in neighbouring lakes.

The notes which had been produced prior to the evacuation of the camp were collected weekly by KRUEGER and were probably distributed to German Embassies and Legations abroad.

~~Arrests:~~ The number of arrests among leading personnel of Group VI F has been very small. The gap is a substantial one, as it is especially desirable that the technical achievements and methods of the G.I.S. should be known. Appended is a list of VI F technicians whose arrest should be notified as soon as effected so that a detailed interrogation on technical matters can be arranged.

a) Leading VI F Personalities:

Oberstleutnant BOENING	Gruppenleiter
Stubaf DOERNER	Former Gruppenleiter
Stubaf LASSIG	Referent VI F 300 T.9
Stubaf KRUEGER	Referent VI F 4
Hastuf WEIDELING	Administrative Officer
Stubaf FAHROSS	Leiter Havd Institute
Stubaf SIEPEN	Former Leiter Havd Institute.

b) Technical Experts:

Dr. TAUBOECK

Specialist on secret inks. TAUBOECK should be considered a priority target.

Dr. SCHAMBERGER

A specialist in chemical matters, formerly on the staff of I.G. FARben. SCHAMBERGER should be in a position to give full information on the use of secret inks and poisons.

Frl. ISSEK

Trained agents in use of secret inks.

Professor ZAPP

Head of the VI F school in micro-photography at 1 Georg Beer Strasse, Dresden. ZAPP is of special importance as he is reported to be the inventor of the latest German models of micro-dot cameras.

Oschaf VOIGT

Photography expert of VI F 3.

The importance of those personalities concerned with micro-filming is increased by the fact that it has been reliably reported that attempts were made by VI F to reproduce Amt VI records by this means for concealment. While it is not believed that this attempt was successful but it is important to establish how far such arrangements were succeeded with such arrangements.
